Repairing Aged Skin
Benefits of Botox®
June In-Office Promotion
Did You Know Facts

Through out the years we've been instructed to eat a healthy diet, avoid excessive sun exposure, and ultimately, age with grace no matter what comes our way.

With these words of advice in mind, the question of what will realistically help us fight the aging process remains important.

For the purpose of preventative care, we encourage an antioxidant-filled

diet, along with topical products that will fight off harmful free radicals.

Treating the skin with serums and creams can significantly improve skin tone, texture and radiance, while ultimately helping prevent fine lines and wrinkles.

We encourage you to schedule a consultation with one of our providers to learn about which skin care regimen is best for you.

Simple Solution for Fine Lines, Wrinkles

Botox® (onabotulinumtoxinA) and Juvéderm® XC can significantly reduce fine lines and wrinkles on the forehead, around the eyes and near the mouth

Preventative care is always important, but for those who've already experienced fine lines and wrinkles, a skin care solution requires a different approach aside from topical creams and antioxidant-filled diets.

An effective way to treat frown and wrinkle lines is through the use of a cosmetic injectable known as Botox® or with a filler known as Juvéderm®. Both of these products are used to lessen fine lines and wrinkles that form in and around the forehead, eyes and nasolabial folds of the mouth.

For frown lines, crows feet and other lines that form around the eyes, we recommend Botox® cosmetic. For areas near the mouth, we recommend

a filler like Juvéderm® XC that, when injected, leaves the skin looking wrinkle-free while providing comfort with its added numbing agent. For questions regarding the Botox® or Juvéderm® procedures call our office at 480.610.6366.

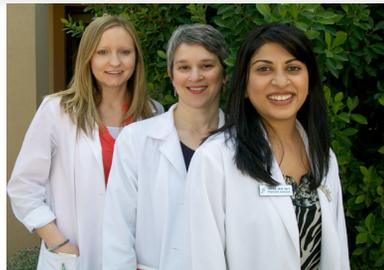

Did you know?

Antioxidants protect the skin from harmful free radicals

Free radicals can be found in our bodies and in the external environment

Dark chocolate is an excellent source of antioxidants

Our office provides many antioxidant products that help prevent fine lines and wrinkles
