Effective Wrinkle Treatment

Patients can receive more immediate treatment of wrinkles with the use of Dysport™ (abobotulinumtoxinA)

Skin is the body's largest organ measuring approximately 12 to 20 square feet. It is made up of three layers that form a protective shield that guards our bodies against hazardous environmental factors like UV radiation, excessive temperatures, and cuts or scratches.

Every 27 days the skin cycles itself and provides our bodies with a new top layer. Unfortunately, this process slows at the age of 25 and rejuvenation diminishes. This slowing is what causes

the aging process to become visible.

Fortunately, cosmetic injectables are an efficient and reliable way to treat many wrinkles. Stockton Dermatology offers a variety of both injectables and fillers, among them are: Dysport™, Botox®, Juvéderm®, Perlane® and Restylane®.

Perlane Restylane

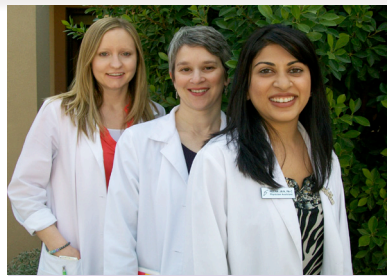

Did you know?

Injectables are used to relax muscles while fillers are used to create volume

Anti-aging products help treat common skin irregularities

Dysport™ is an injectable particularly effective for the treatment of frown and wrinkle lines that form around the eyes

Dysport™ provides very similar results to that of Botox® and is an alternative based on personal preference

The Stockton Dermatology providers offer honest answers and advanced solutions. Services are available with our six providers: Dr. Toni C. Stockton M.D. F.A.A.D., Reena Jain, PA-C, Maggie Stark, PA-C, Laura Devlin, NP-C, Jodi Stephens, R.N. and Laurie Evans, L.E. C.M.L.T.

In our society, obtaining long-lasting, younger-looking skin is paramount in the quest for a youthful appearance. As our bodies naturally age, fighting the effects of this process can seem difficult or impossible to combat. Luckily, working against this natural process can be controlled with the use of proper skin care treatments, specifically by the use of injectables.

Many skin care products and treatments can significantly reduce the effects of wrinkles and fine lines. Among the more effective FDA approved treatments is Dysport™ abobotulinumtoxinA.

Dysport™ is used to temporarily treat moderate to severe wrinkles above and around

the eyes. This type of treatment is one such remedy that provides patients with a more youthful appearance as fine lines and wrinkles fade, leaving the skin looking younger.

Stockton Dermatology invites you to call and schedule a consultation with a member of our staff at 480.610.6366 to ask about how Dysport™ could be used to treat your skin.
