## Meet the Stockton Aesthetic Team

*Laurie, Brynn and Ashli are the providers you'll meet when you schedule any type of cosmetic treatment.*

When it comes to cosmetic services, those at Stockton Dermatology understand that patients deserve quality service, reliable answers and reputable results.

While Toni C. Stockton, M.D. continues to be the lead of the aesthetic team; she has a trained support staff that provides many aesthetic services. The providers include Laura Devlin, NP-C, Laurie Evans, L.E. C.M.L.T., Brynn Niu, L.E. C.M.L.T. and Ashli Thielbar, licensed aesthetician.

The aesthetic team provides laser hair removal, fractional and non-fractional laser resurfacing, microdermabrasions, chemical peels and facials. Dr. Stockton and Laura Devlin perform more advanced procedures like Botox®, Juvéderm™, Dysport™ and Restylane® injections.

Additionally, all of the aesthetic providers are available for cosmetic consultation to discuss which treatments are best. During the consultation a patient can expect to get accurate answers regarding skin care products, services and regimens. For more information about the aesthetic providers or the procedures that they perform, patients are encouraged to visit [www.StocktonDermatology.com](http://www.StocktonDermatology.com).

Stockton Dermatology is the first office in Arizona to offer a more powerful treatment of rosacea, sunspots, irregular pigmentation and vessels on the face hands and chest.

The new, stronger procedure is known as Intense Pulsed Light (IPL)- a procedure that the practice has previously offered but with less power compared with the treatment now.

The strength of the procedure comes from the technology in the new MaxG hand piece. This new device allows the treatment to be stronger and go deeper, while providing more reliable results for those who may have experienced minimal results with the IPL treatment in the past.

For information please call our office at 480.610.6366

## Before and After
